PROFESSIONAL SUMMARY

Software engineer with hands-on experience building responsive full-stack applications, strong frontend skills, and a solid foundation in modern software development. Skilled in designing clean user interfaces, integrating REST APIs, and delivering polished frontend features across the full development lifecycle. Detail-oriented, collaborative, and comfortable working in fast-paced environments.

EDUCATION

Southern New Hampshire University

Bachelor of Science in Computer Science

May 2nd, 2026

Johnson County Community College

May 2023

EXPERIENCE

Robotics Instructor

2023 – 2024

iCode

- Instructed students ages 6 to 11 in robotics and introductory programming using Python and Scratch through project-based learning.
- Guided students in designing, programming, testing, and refining robotic solutions to promote logical thinking, creativity, and problem-solving.
- Delivered lessons on programming fundamentals such as variables, conditional statements, loops, and debugging.
- Simplified technical concepts through visual demonstrations, interactive presentations, and hands-on instructions tailored to young learners.
- Mentored students throughout the software and robotics development process to encourage collaboration, confidence, and critical thinking.

PROJECTS

Posh Paws Boarding: [Live Demo](#)

React & Node.js Full-Stack

- Developed a responsive full-stack pet boarding system with React, supporting booking and check-in workflows.
- Designed and implemented over 10 RESTful API endpoints for pet bookings, check-ins, and customer management.
- Created over 8 reusable React components with Hooks and asynchronous API calls to support booking workflows, instant validation, and seamless UI updates.
- Integrated MongoDB for data storage, optimized queries, and tested API endpoints using Postman.
- Managed application state with React Hooks and connected frontend components to backend services via RESTful APIs.

Photomemories Web Application: [Live Demo](#)

Frontend

- Developed a multi-page website using HTML, CSS, and JavaScript, applying responsive design principles.
- Implemented client-side form validation and interactive booking workflows.
- Designed reusable UI components, responsive layouts, and media-query interfaces optimized for desktop and mobile devices.
- Tested responsive layouts and debugged frontend issues across modern browsers to ensure a consistent user experience.

TravlR Website: [Repository](#)

MEAN Stack

- Developed an Angular single-page application with an Express backend to deliver a responsive travel booking experience.
- Developed REST API endpoints and resolved CORS issues to integrate frontend and backend.
- Built an Angular application and Express REST API with MEAN stack, applying MVC architecture to enhance maintainability and scalability.

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+)

Frameworks & Libraries: Node.js, Express.js, React, Angular, Bootstrap, jQuery

Databases: MongoDB

Developer Tools: Git, GitHub, Postman, Webpack, NPM, Visual Studio Code, Chrome DevTools, ChatGPT (OpenAI)

Frontend Development: REST APIs, Responsive Design, Cross-Browser Compatibility, CRUD Operations, Accessibility, MVC, Asynchronous Programming
