PROFESSIONAL SUMMARY

Frontend engineer with hands-on experience building responsive, component-driven web applications using React, JavaScript, HTML, and CSS. Skilled in designing clean user interfaces, integrating REST APIs, and delivering polished frontend features across the full development lifecycle. Comfortable working independently and collaborating in fast-paced environments.

EDUCATION

Southern New Hampshire University

Bachelor of Science in Computer Science

May 2026

Johnson County Community College

Associate of Science

May 2023

EXPERIENCE

Software Engineer

2023 – 2024

Pro AV Systems

- Maintained the internal AV team website by building and documenting reusable UI components using JavaScript, HTML, CSS, and React
- Updated and enforced design tokens, including colors, typography, and spacing, to maintain visual consistency across the interface
- Adjusted interfaces used by customer support and operations teams to interact with databases safely and efficiently
- Ensured all components met responsiveness and accessibility standards across desktop and mobile interfaces

Software Engineer Intern

2022 – 2022

Outdoorsy

- Developed and tested frontend features using JavaScript and React
- Participated in code reviews and contributed to debugging across the codebase
- Integrated REST APIs to retrieve and display application data in the UI

PROJECTS

Posh Paws Boarding <https://poshpawsboarding.netlify.app/>

React & Node.js Full-Stack

- Built a full-stack pet boarding system supporting booking and check-in workflows
- Designed and implemented 10+ REST API endpoints supporting pet bookings, check-ins, and customer management
- Developed 8+ responsive React components for booking and pet management workflows, leveraging React hooks and asynchronous API calls to provide instant validation, reservation confirmation, and seamless UI updates
- Integrated MongoDB for data persistence, optimized query performance, and tested endpoints using Postman
- Managed application state using React hooks and connected frontend components to backend services through RESTful APIs

Photomemories Web Application <https://photomemoriesv1.netlify.app/>

Frontend

- Built a responsive multi-page website using HTML, CSS, and JavaScript
- Implemented client-side form validation and interactive booking workflows
- Designed reusable UI components and responsive layouts optimized for desktop and mobile devices

TravlR Website <https://github.com/CKDCalvin/cs465-Fullstack>

MEAN Stack

- Built a full-stack booking application with an Angular SPA and Express backend
- Developed REST API endpoints and resolved CORS issues for frontend – backend integration
- Built an Angular SPA and Express REST API using the MEAN stack while applying MVC architecture to improve maintainability and scalability

SKILLS

Frontend: HTML, CSS, JavaScript (ES6+), React, Angular, Bootstrap

Concepts: REST APIs, Responsive Design, CRUD Operations, Accessibility

Backend: Node.js, Express.js

Databases: MongoDB

Tools & Technologies: Git, GitHub, Postman, Webpack, NPM, Visual Studio Code
